Table of Contents for Volume 42

A.I.S.I. Standard Steel Compositions *(d)* 523-B, 877
A Sour Note: Copper Production Lags, by Ernest E. Thum 668
A Volunteer Industry Reports, by R. L. Collier 528
Adhesion of Tin-Base Bearing Metals, by W. T. Pell-Walpole, J. C. Prytherch and B. Chalmers *(a)* 438
Advanced Forging Process and Machinery Adapted to Shell Production, by R. H. Jones 728
Advances in Fast Surface Hardening, by Frederic O. Hess 399
Aluminum Alloys — Compositions, Properties, and Designations of American Commercial Alloys, by H. S. Jerabek *(d)* 675
Aluminum Bronzes Commonly Used in Aircraft, by W. W. Edens *(d)* 678
Alloy Powder Produced in Quantity, by H. E. Hall 734
Alumina From Low Grade Bauxite, Alunite and Clay, by Advisory Committee to WPB 197
"Amola" Steels (Carbon-Molybdenum), by Fred E. McCleary 386
Anomalous Hardness of Welds in Low Alloy Steels, by J. H. G. Monypenny *(c)* 237
Appraisal of NE Steels in Terms of Old Types, by Francis B. Foley 365
Austenitic Structure, by N. J. Petch *(a)* 120
Automatic Equipment for De-Scaling Shells, Inside and Out, by P. J. Potter 776
Automatic Units for Heat Treating High Explosive Shells, by D. H. Gardner and John Wallerius 861
Balancing Increased Production of Various Types of Toolsteels, by Floyd Rose 529
Bearings and Bushings for the War Effort, by E. Olney Jones 670
Benjamin Franklin Shepherd, Sauveur Medalist for 1942, an Eminent Living Metallurgist, by Theodore A. Serrill 858
Better Equipment Despite Shortages, by George W. Graves 691
Better Instrumentation by Educating Maker and User, by L. W. Wheeler 687
Better Oils for Cutting and for Quenching, by H. P. Hobart 739
Bigger and Bigger Steam Hammers, by Macdonald S. Reed 728
Blast Furnaces Break Records, by Arthur G. McKee 591
Bright Hardening Atmosphere Readily Produced From Commercial Gas, by C. E. Peck 599
Bright Hardening of Ordnance Parts, by J. A. Dow 600
Brittleness in Chromium Irons *(a)* ... 860
Bronze Gear Alloys *(w)* 61
Can Tin Scrap Make Good Steel? *(ep)* 84
Carbon and Synthetics Replace Scarce Nickel and Rubber, by Carl E. Heil 776
Carburizing Moly High Speed Tools, by L. F. Train *(bp)* 1050
Carburizing Test on NE 8620 and 8817, by George A. Nelson *(bp)* 867
Case Depth Defined (?), by Metallurgicus *(bp)* 376
Case Depth for Accurate Hardness Readings, by Metallurgicus *(bp)* ... 233
Case With Controlled Carbon *(bp)* 70
Case With Controlled Carbon, by I. A. Usher *(bp)* 1048
Caustic Embrittlement *(a)* 1134
Cheap Izod Test Piece, by Metallurgicus *(bp)* 70
Chemico-Physical Role of the Cutting Fluid, by Milton C. Shaw 85
Chromium Recovered From Ore and Stainless Scrap, by A. L. Feild 530
Chromium Reserves Greatly Increased, by Marvin J. Udy 532
Combustion of Common Gases *(d)* ... 652
Combustion Oil or Gas Fuel System, by George F. Naab 602
Composite Railroad Bearing Conserves Copper, by E. S. Pearce 368
Conserves Copper, Tin and Lead, by E. I. du Pont de Nemours & Co. 773
Constitution of the Iron-Tin Alloys, by O. E. Romig 899
Consumers and Producers Study Problems Cooperatively, by George W. Pressell 595
Contacts—Joints—Silver Makes Them, by Robert H. Leach 672
Continuous Check Against Tarnish When Annealing Shell Cases, by Charles P. Masure 694
Continuous Furnace Operation Demands Excellent Auxiliaries, by R. A. Brackett 601
Control Equipment Speeds Metallurgical Processes—New and Old, by C. E. Sullivan 694
Controls Production of Better War Products, by Leeds & Northrup Co. 695
Convection Heating Extends to High Temperature, by Cary H. Stevenson, 597
Conversion Tables for Lengths *(d)*..522-V
Cooling Power of Quenching Baths, by M. Asimow and M. A. Grossmann *(d)* 622

Cooperation of Tool Users Invaluable to Toolsteel Makers, by Arthur T. Clarage 528
Cooperation With Armed Services, by Carnegie-Illinois Steel Corp. 530
"Custom Built" Furnaces Made on Production Line, by G. H. Clamer.. 592
Cuts Polishing Time 20%, by James J. Manderscheid 777
Cutting Out Waste Time in the Forge Shop, by Roy A. Kropp..... 731
Deceptive Appearances in Auto-Radiographs, by H. R. Nelson *(c)*..... 391
Defects in Cast and Wrought Steel Caused by Hydrogen, by Carl A. Zapffe 1051
Dry Blast for Blast Furnaces, by David Wolochow *(a)* 546
Economical Instrumentation Helps Everybody, by C. O. Fairchild..... 687
Economies by Welding, by Albert M. Portevin *(c)* 395
Electric Furnaces, 16 to 1, by Carl L. Ipsen 599
Electric Furnaces for Electric Steel, by American Bridge Co. 592
Electrographic Methods of Surface Analysis, by M. S. Hunter, J. R. Churchill and R. B. Mears 1070
Electrolytic Polishing of Brass and Copper, by G. J. Foss, Jr. and Larry Shiller 77
Electrolytic Polishing of Metals, by G. E. Pellissier, Jr., Harold Markus and Robert F. Mehl *(d)*..... 709
Electronic Gages Operate 'Round-the-Clock, by Donald E. Williamson.... 696
Embrittlement of Chromium Irons, by G. Riedrich and F. Loib *(a)*..... 234
End-Quench Hardenability Curves of NE Steels *(d)* 857
Engineering the Treatment of 155-Mm. Shell, by R. F. Wilson..... 359
England Saves Tin *(a)* 1094
Equilibria for Gas-Steel Reactions *(d)* 712
Ether and Audible Spectra *(d)*..... 714
Expanding America's Aluminum Capacity by 650%, by Thomas D. Jolly 73
Expanding Use of Induction Heating, by J. W. Cable 601
Extended List of National Emergency Steels (August 17, 1942)..... 398
Factors Influencing Austenitic Grain Size, by Thomas G. Digges and Samuel J. Rosenberg *(a)*..... 608
Fast Analytical Returns Speed Production and Cut Rejects, by H. W. Dietert 691
Fast Sorting of Mixed Pieces by Their Magnetic Characteristics, by P. E. Cavanagh *(c)* 394
Faster Cutting With Multi-Carbide Tools, by Philip M. McKenna..... 736
Faster Heat Treatment of Ordnance, by Frederic O. Hess 601
Faster Hydraulic Equipment, by Howard F. MacMillin 729
Ferric Sulphate for Cleaning Cartridge Brass, by Francis J. Curtis 775
Figuring Reduction of Area, by N. J. Alleman *(bp)* 376
Finding a Little Iron in a Lot of Copper, by Albert C. Holler *(bp)*..... 377
"Fish-Eyes" in Steel Welds Caused by Hydrogen, by Carl A. Zapffe..... 201
Five Methods Devised for Economical Tool Selection, by R. H. McCormick 736
Five Times as Many Testing Machines, by C. E. Peterson 693
Fixing Bearing Metal in Steel Shells *(w)* 213
Fluxes for Oxy-Acetylene Welding & Brazing, by Houston E. Landis, Jr. and F. C. Saacke *(d)*..... 766
Francis Cowles Frary, Researcher in Aluminum, Eminent American Metallurgist 384
Fundamentals of Good Carburization, by James K. Stanley 849
Furnaces Become In-Line Production Machines, by George F. B. Owens... 598
Furnaces Designed to Save Critical Materials, by A. J. Nordenson..... 597
Fusion Welding of Magnesium, by Thomas E. Piper *(a)*..... 404
Ghost, by Carl G. Johnson *(c)*..... 237
Hardenability Calculated From Composition, by Marcus A. Grossmann *(d)* 81, 660
Hardenability of Steel Calculated From Chemical Composition, by Marcus A. Grossmann 80
Hardness Conversion Chart for Steels *(d)* 723
Hardness Traverses of Amola Steels *(d)* 389
Heat Treater—Mind That Quench *(cp)* 84
Heavy Forgings of Copper Steel, by M. L. Faure and M. Friart 456
Heavy Forgings Tripled Over Previous Record, by S. B. Heppenstall, Jr..... 729
Helping Make "Armor-of-Proof", by Charles H. Wilson 693
Helping New Men Perform New Tasks, by Harrison I. Dixon 594
Helping the Jobbing Machine Shop Convert to Rapid Mass Production, by L. C. Welch 740
High Strength Bronzes From Scrap, by William Romanoff 670
Huey Corrosion Test for 18-8 Steel, by F. Meunier and H. M. Schnadt *(a)*.. 564
Hyper-Mills Cut Double to Six Times as Much Metal, by Donald G. Clark 737
Impact Specimens for Hardened Steel, by A. S. Jameson *(bp)*..... 376
Improved Castings Meet Many Emergencies, by Oliver Smalley 526
Improved Lubricants for Severe Services, by John M. Lupton..... 740
Improved Plants, Enhanced Skills, by William R. Webster 670
Improved Surface Condition of Cast Projectiles, by Albert M. Portevin *(c)* 239
Improves Bearings and Solders, by M. T. Ludwick 778
Improving the Notched-Bar Test, by M. A. Scheil *(bp)*..... 233
In Selecting Substitute Steels, Watch for Toughness, by Harry B. Knowlton, *(bp)* 1050
Increase Production by Raising Output per Man-Hour, by James F. Lincoln *(c)* 235
Increased Production of Lead Products, by R. L. Hallett..... 672
Increasing Production; Helping Others, by H. G. Batcheller 529
Influence of Tin on Alloy Steels, by G. Bolsover and S. Barraclough *(a)* 214
Inspecting Aluminum Welds *(a)*..... 258
Inspection of Copper Welds *(a)*..... 102
Inspection of Spot Welds in Aluminum *(a)* 367
Intense Production of Fundamental Chemicals, by R. H. Landis..... 773
Iron, Iron Carbide Equilibrium Diagram *(d)* 606
Is Direct Iron (Sponge Iron) a Substitute for Melting Stock? by R. S. Dean and Advisory Committee to WPB 1040
Isn't There Something Wrong Here? *(cp)* 1058
Laboratory Equipment for the Control of War Production, by Howard Draving 696
Lead Being Stockpiled, by Erwin Vogelsang 1039
Light Metal Castings in Triple Number, by M. A. Beckmann 667
Look-Learn Films on Welding Speed up Instruction 20%, by C. I. MacGuffie 733
Magnesium Becomes a Vital Structural Metal, by L. B. Grant..... 667
Magnesium Fabricated in Mass Production, by Wiser Brown 668
Magnetic Inspection of Cylinders, by C. S. Williams *(bp)* 70
Manufacturing Grinding Machinery on Assembly Line, by Norton Co..... 739
Measurement of Case Depth, by Ernest J. Lueders *(bp)* 868
Measuring Moisture in "Bone Dry" Hydrogen, by P. R. Kalischer *(bp)* 233
Melters and Melting Stock Needed for Electric Steel *(cp)* 1057
Melting Furnaces Right up at the Front, by Albert E. Rhoads..... 593
Memory Aids for Welders, by Joseph V. Kielb *(bp)* 1048
Metal Cleaners Eliminate Production Bottlenecks, by E. F. Clark..... 775
Metal Progress in High Schools, by Ed G. Mahin *(c)* 397
Metallurgical Aspects of Spot-Welds in Aluminum Alloys, by J. R. Heising and E. H. Burkart 1027
Metals, Men and Machines, by Norman A. Schuele 669
Method of Sampling for Metallurgical Test Pieces, by C. T. Eakin..... 207
Million-Volt X-Ray Unit Speeds Heavy Production, by W. S. Kendrick..... 688
Minor Metals Fairly Plentiful, by Gar A. Roush 665
Modern Gun and Armor Furnaces, by J. L. Whitten..... 598
Molybdenum—the American Alloy, by Carl M. Loeb, Jr..... 531
More Alloys, Better Used, by William H. Phillips 532
More and Better Grinding Materials Despite Lack of Imported Ingredients, by H. P. Kirchner 738
More and Bigger Forging Machines, by W. W. Criley 727
More Electric Furnaces Make More Quality Steel, by H. H. Watson 593
More Furnaces in 18 Months Than in 15 Years, by Henry M. Heyn 596
More Pig Iron From 12 New Blast Furnaces *(cp)* 83
More Products From Powdered Metals Rather Than Different Processes, by L. H. Bailey 736
Never a Dull Moment, by Frank R. Palmer 529
New Tool Alloy Speeds Machining, by R. L. Lerch 739
Nickel Helps the United Nations' War Effort, by Thomas H. Wickenden.. 533
Nomograph for Calculation of Corrosion Rates, by L. D. Yates and E. P. Tait *(d)* 1059
Openhearth Records Due to Managerial Ability, by William C. Buell, Jr. 592
Oxidation of Copper *(a)*..... 962
Pearlitic Malleable Irons *(a)*..... 534
Plate Rider Cuts Compound Bevels on Armor, by J. H. Zimmerman..... 732
Powdered Iron Makes Superior Cores for Radio Transformers, by A. B. Mullaly 735
Power Brushing Replaces Hand Finishing Methods, by G. O. Rowland.. 774
Precision in Creep Testing, by J. A. Fellows, Earnshaw Cook and H. S. Avery *(a)* 1088
Prevention of Cracks in Welded Light Alloy Steel, by E. C. Rollason and A. H. Cottrell *(a)*..... 212
Producing More Furnaces—Better and Faster, by R. F. Benzinger..... 596
Properties of Refractory Materials, Except Fireclay, by S. M. Phelps *(d)*.. 640
Protection Against War Chemicals, by Walter P. Burn 522-R
Protective Coating Replaces Strategic Metals, by Fowler W. Wilbur..... 778
Psychrometric Charts, High Range and Low Range, by D. B. Brooks *(d)*.689, 692
Purchase Properties Rather Than Chemistry *(cp)* 1058
Put the Older Instruments Back to Work, by L. G. Bean..... 690
Quenched Austenitic 18-8 (Nitrogen Free) Changes to Ferrite at 70° F., by Herbert H. Uhlig *(c)*..... 391
Quenching Powdered Metal, by N. J. Petch *(bp)* 233
Range Finders, Binoculars, Military Cameras, Get Priority, by I. L. Nixon 693
Rating of Inclusions ("Dirt Chart"), by George W. Walker *(d)*..... 562
Reclaiming Values From Bullet-Jacket Scrap *(a)* 866
Recovery of Values From Mixed Stainless Steel Scrap and Waste, by R. H. McCormack and G. F. Kinney *(c)*.. 236
Reducing Amount of Circulating Metal in Process, by Harry J. Huester.... 666
Re-Educated Workmen Build Heavy Machinery, by R. G. Hartwell 731
Relative Effect of Elements on Alloy Steels, by John Mitchell 53
Removing Scale and Stain From Brass *(bp)* 867
Removes Scale but no Metal, by Thomas H. Wilber 778
Revival of Converter Cast Steel, by A. W. Gregg 527
Right Fluid Speeds Metal Cutting by 30%, by Tracy B. Langdon 739
Ruling a Grating on Smooth Metal Reveals Hardness Variations, by Bo Ljunggren *(a)* 698
Rules Governing Forging Machine Dies, by E. R. Frost *(d)*..... 756
Saves Tons of Chromium and Nickel, by R. D. Thomas 733
Saving Alloys in Steel by Using "Addition Agents" 1061
Saving Chromium Alloy in Heat Resisting Steels, by G. Riedrich *(a)*.. 140
Saving Tin on Cans (WPB Official Release) 876
Scrap Steel Still Short *(cp)*..... 83
Secondary Copper for Bearings, War Work & Alloy Steel, by Advisory Committee to WPB (Draft by Ernest E. Thum) 221
Separation of High Speed Steels by Spark Testing, by L. P. Tarasov *(bp)* 868
Seven Aspects of the National Metal Congress 879
Steel Making and Minor Matters, by Frank G. Norris 879
Heat Treatment 883
Welding Highlights, by Joseph V. Kielb 883
Cutting of Steel, and Tools Therefor, by O. W. Boston..... 887
Non-Ferrous Section, by F. N. Rhines 890
Recruiting and Training of Inspectors, by LeRoy L. Wyman 893
Points of Theoretical Interest, by Malcolm F. Hawkes 895
Seven Times as Much Aluminum, by S. K. Colby 666
Shepherd Grain Size Fracture Standards, by George K. Manning *(d)*.... 227
Silicon-Iron Equipment Essential for Many of the New Synthetics, by D. E. Jack 531
Simplified Electro-Polishing of Steel Specimens, by R. Wayne Parcel..... 209
Six Times as Much Insulating Brick, by G. E. Grimshaw 594
Soft Roots Corrected, by L. F. Train *(bp)* 377
Solidus in Iron-Graphite System, by Ralph Hultgren *(c)* 392
Some Factors Affecting the Drawability of Aluminum Sheet, by G. A. Brewer, V. N. Krivobok and Mabel M. Rockwell 62
Soot Deposits *(a)*..... 926
Spark Test for Metals *(d)*..... 586

(*a*) Abstract; (*bp*) Bits and Pieces; (*c*) Correspondence; (*cp*) Critical Points; (*d*) Data Sheet; (*w*) War Products Consultation.

Specific Effects of Alloys in Steel, by Edgar C. Bain *(d)* 539
Spheroidize Annealing of S.A.E. 52100 Steel, by Raymond J. Hafsten 869
Spot Test for Chromium, by W. O. Philbrook 1035
Spot Test for Moly Steel, by Raymond Townsend *(bp)* 234
Standard Drawing Dies (Carbide) for Small Ammunition, by Earl Glen .. 229
Standard Grain Sizes for Steels *(d)* .. 550
Standard Tolerances for Forgings up to 100 Lb. *(d)* 730
Standardized Testing Machines Made by Mass Production Methods, by Francis G. Tatnall 688
Standardized Tools Speed Production, by W. G. Robbins 737
Status of Steel Expansion Program, by W. A. Hauck 218
Steel Plants Fabricate Munitions, by Charles M. White 525
Steel Plate Production 256
Steel Production Records Are Only Something to Break, by Carnegie-Illinois Steel Corp. 526
Strategic Materials, by Harvey A. Anderson 363
"Stretch Point" for Extension-Under-Load Measurements, by R. J. Brown *(e)* 235
Strip Steel at Practical Capacity, by C. M. Beeghly 526
Stripped Units Get Production Going; Accessories Mounted Later, by W. W. Davidson 774
Substitute Materials Adapted to Temperature Controllers, by M. J. Rauscher 695
Substitute Steels *(w)* 856
Sub-Zero Harnessed to War Products, by Alfred C. Houser 602
Suitability of Alternate Steels for Aircraft Parts, by A. C. Willis and Morse Hill 370
Sulphur Prints of Wrought Iron Rails, by C. M. Nitchie and Charles Y. Clayton *(c)* 238
Supply and Demand for Copper, by H. O. King 874
Surface Preparation for Spot Welding Aluminum *(a)* 912
Surplus Lead to Stockpile, by Irwin H. Cornell 672
Tank for Oil Quenching, by Wm. J. Diederichs *(bp)* 71
Technical Help for Plants Newly Producing War Materials, by W. M. Cole 775
Tellurium of Use to a Foundry *(cp)* .. 1058
Temper Without Delay, by N. C. Fick *(bp)* 1049
Temperature Conversion, by Leonard Tulauskas *(c)* 393
Temperature Conversions *(d)* 522-X
Temperature Conversions, Suggested Method, by Joseph G. Koosman and Frank G. Norris *(bp)* 1048
Three Tons of American Steel for Each Two From the Axis, by Walter S. Tower 525
Tightening Large Bolts in Place, by Ernest F. Miller *(bp)* 1049
Tin, Smelted in America, by Gar A. Roush 668
Tool Hardener: Watch That Anneal!, by Thomas R. Lewis and Columbus Verdi *(bp)* 868
Tool Hardening; Practice, Not Theory, by Robert C. Stewart 378
Toolsteels Classified by Wear-Toughness Ratio, by Harold B. Chambers *(d)* 542
Toolsteels for Hot Working Iron and Steel, by H. E. Replogle *(d)* 750
Transformation of Austenite in 0.89% Carbon Steel at Constant Sub-Critical Temperature *(d)* 617
Trouble-Free Mounting Press, by H. M. Shannon *(bp)* 1050
Trouble Shooting for Soft Spots, by D. J. Mack *(bp)* 1049
Truly Automatic Hardening and Brazing at High Speed, by William E. Benninghoff 600
Up-Grading of Scrap Brass to War Uses, Part II of Report to OPM by Advisory Committee, National Academy of Sciences (by E. E. Thum) .. 66
Use of High Lead Solders *(bp)* 377
Versatile Induction Hardening *(cp)* ... 1057
Wanted: Better Metals to Fight Hitler *(cp)* 84
Wedge-Draw Vs. Tension Test to Determine Drawability, by Given A. Brewer 216
Weldability of Substitute Steels, by A. B. Kinzel *(a)* 71
Welding Expands Six-Fold, by J. F. Lincoln 732
Welding Symbols *(d)* 744
Welds Armor Four Times as Fast, by Edward J. Brady 733
What Is "Decarb"?, by Metallurgicus *(bp)* 867
Working 100% for Offensive War, by H. L. Showalter, Jr. 727
